Christchurch

# What you should know about Concrete Tactile Pavers

## Facing Up to the Benefits

- The vertical wall feature ; this means absolutely no gaps between pavers
- All our products are completely compliant with NZTA standards RTS14
- Ideal Solid Yellow Colour and entirely UV stable for New Zealand's brilliant sun
- Very durable 50 MPa concrete
- Fully sealed for ultimate protection
- High in anti-slip with grip tread design
- Comes in two thicknesses: 40mm & 60mm
- Easy to install – You will be amazed!

## What is Government Safety Standards RTS 14?

The NZTA (a NZ Government agency) outline standards for Tactile indicators, such as concrete pavers, in the RTS 14 document. This involves specified measurements and installation principles in order to meet the requirements of the New Zealand Transport Agency.

## Does the look count?

Yes! No gaps, means no weeds and no mess. What's more, the majority of these pavers are installed in public areas which reflect the look of the city. The Total Tactilez™ tactile pavers feature a vertical wall and are fully compliant with NZTA Standard RTS 14, which are 100% perfect for the Christchurch rebuild. The image below clearly demonstrates how messy things can look only a few months after installation. However, with Total Tactilez we only offer high quality (and they're manufactured locally!)

An example of how alternative non-compliant products can look.
