Slip-Grip  
Stainless Steel Discs

**5** year  
warranty  
For drill and install system

**P5** High Slip  
Resistance  
Stair Nosings  
0.63 COF Slip Resistance

## Product Data Sheet

- Excellent Anti-Slip Rating
- Easy retro fit install
- 316 Marine Grade Stainless Steel
- Superb abrasion qualities

## Composition & Features

The TacStud Slip-Grip Stainless Steel Discs are made from hard wearing 316 Marine Grade Stainless Steel, two-piece stainless-steel construction and have been designed for safety and dignity, whilst providing superior durability in all substrates. 316 Marine Grade Stainless Steel is only used to ensure no corrosion or rust in our marine environments.

The retrofit design fixed by stems for epoxy and fitting into most substrates has meant the TacStud Slip-Grip Stainless Steel Discs has proven its design and specifications in many harsh conditions and high foot traffic environments. The pin stem inserts through the disc holding down the disc down, whilst allowing the disc to turn if necessary.

Adhesive taped backing is available for our TacStud Slip-Grip Stainless Steel Discs where a substrate is deemed unsuitable to drill into. Warranty conditions apply to this method of installation.

## Standards

The TacStud Stainless Steel Concentric Circle Studs comply and exceed the requirements of:  
AS/NZS 3661.1.1993  
AS/NZS 4586:2004

## Types & Applications

- STTANTSLPDSKSTM – 25mm disc, 15mm stem x 6.0mm diameter stem epoxy fitted (Hilti RE500) into Concrete, Timber, Pavers, Vinyl, Tiles, Stone Paver Substrates
- SGDISCFSST – 25mm disc with butyl tape adhesive backing
