

Pyramid

BAR040-SS

SNRBTBRNSGPYR4MM

The Pyramid Rebated Bar Nosings are made from hard wearing 316 marine grade stainless steel.

These are anodized 25Um allowing for a hard wearing surface to prevent any corrosion. The retrofit design fixed by a solid stainless steel shaft, cast as a one piece extrusion allows the bars to sit in 3.5mm cut grooves with 3.0mm cover flanges either side to cover any chipping from cutting into the substrate.

Suggested spacing on all substrates is 25mm to allow for good tread grip, whilst providing sufficient contrast to the surrounding surface area.

Features

- Interior and exterior use
- Epoxy fitted into grooves

Application:

Fitted into Concrete, Tiles, Pavers, Timber & Stone Paver Substrates

Length:

1500mm/2000mm (Cut-to-length service available)

Colours: Natural stainless steel

Other options: Solid Brass, Aluminium
